## Interface for the integration of Hitachi's Air-to-Water units into KNX TP-1 (EIB) control systems.

Compatible with Air-to-Water Yutaki S, Yutaki S Combi, Yutaki S80 and Yutaki M series.

*Application's Program Version:* 1.0

Reference: **HI-AW-KNX-1**

## 1. Presentation

The HI-AW-KNX-1 gateways allows fully bidirectional monitoring and control of the Hitachi Air-to-Water systems from KNX installations.

The interface is compatible with all the models of the Yutaki S line commercialized by Hitachi.

### General features:

- Reduced dimensions, easy and fast installation.
- Multiple control and status objects (bit, byte, characters...) with standard KNX datapoints.
- One status object available for each control object.
- Control on the A.W. unit based on the ambient temperature read from the unit itself or from the temperature read by any KNX thermostat.
- The Hitachi A.W. can be controlled simultaneously through the remote controller of the A.W. system or through the KNX bus.
- Total supervision and control of the Hitachi A.W. unit from KNX, including unit internal variables supervision, special modes control (such as Anti-legionella) and error alarm and codes too.

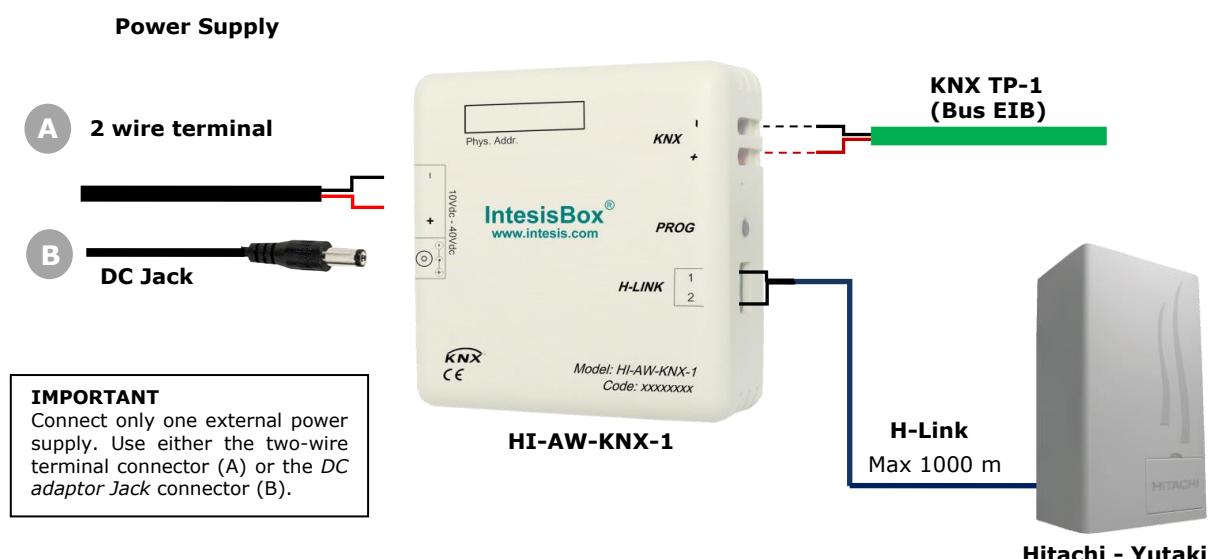

## 2. Connection

Connection of the interface to the AW indoor unit is by means of the cable supplied with the indoor unit to connect the remote controller. It must be connected to the interface in one side (connector H-Link) and to the internal electronic board of the Air-to-Water indoor unit in the other side.

Connection of the interface to the KNX bus is by means of the standard KNX bus connector also supplied with the interface.

In order to plug the interface to the external power supply, two different methods are available. First one is using the external power supply provided with the interface using the DC JACK connector

Connections diagram:

## 3. Installation and setup

This is a fully compatible KNX device that must be configured using the ETS software. The ETS database can be downloaded from:

<http://www.intesis.com/down/eib/HI-AW-KNX-1.zip>

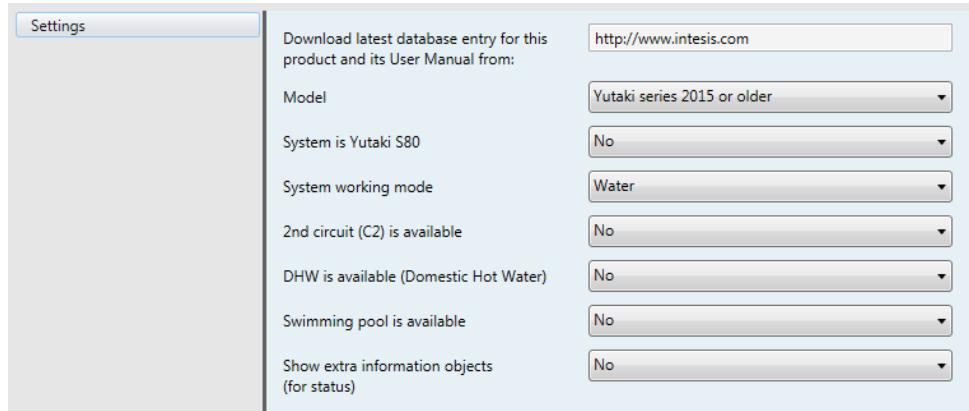

Please, check the README.txt file located inside the zip file to find instructions for proper installation of the database.

**⚠️ IMPORTANT:** Do not forget to select the corresponding features of the Air-to-Water system connected to the HI-AW-KNX-1 interface. This should be selected in the "Parameters" section on the ETS software.

## 4. ETS parameters and communication objects

### 4.1 Default settings

When importing the ETS database for the first time, the following menu appears, with these parameter values selected as default:

**Figure 4.1** Parameter values by default

With this configuration is possible to control the system (Control\_ objects) and monitoring it (Status\_ objects) through the following communication objects:

#### 4.1.1 Run or Stop the unit

- 0: Control\_Unit Run/Stop [DPT\_1.010] - 0-Stop;1-Run

**Figure 4.2** Run/Stop communication objects

This object allows to run or to stop the Hitachi unit features (C1, C2, DHW and/or SwimPool) at once. Sending a "0" value will turn them off, while sending a "1" value will turn them on.

#### 4.1.2 Change de Unit mode

- 1: Control\_Unit Mode [DPT\_20.105] - 0-Auto;1-Heat;3-Cool
- 2: Control\_Unit Mode Cool/Heat [DPT\_1.100] - 0-Cool;1-Heat
- 4: Control\_Unit Mode Heat [DPT\_1.002] - 1-Set HEAT Mode
- 5: Control\_Unit Mode Cool [DPT\_1.002] - 1-Set COOL Mode
- 46: Status\_Unit Mode [DPT\_20.105] - 1-Heat;3-Cool
- 47: Status\_Unit Mode Cool/Heat [DPT\_1.100] - 0-Cool;1-Heat
- 49: Status\_Unit Mode Heat [DPT\_1.002] - 1-HEAT Mode is active
- 50: Status\_Unit Mode Cool [DPT\_1.002] - 1-COOL Mode is active

**Figure 4.3** Unit mode selection communication objects

This object allows changing the working mode of the Hitachi unit. Sending a "0" value the unit will turn into "Cool" mode, while sending a "1" value will make the unit turn into "Heat" mode.

#### 4.1.3 Run or Stop the C1 Circuit

- |6: Control\_C1 Run/Stop [DPT\_1.010] - 0-Stop;1-Run
- |51: Status\_C1 Run/Stop [DPT\_1.010] - 0-Stop;1-Run

**Figure 4.4** C1 circuit Run/Stop communication objects

This object allows to run or to stop the Hitachi C1 Circuit (or C1 climate zone). Sending a "0" value will close the C1 circuit, while sending a "1" value will open the C1 Circuit.

More functions related with the C1 circuit and their communication objects can be seen in section 4.2.3.

#### 4.1.4 Anti-legionella System

**NOTE:** The anti-legionella function is hidden to users by default. Installer can make it available if desired.

- |42: Control\_AntiLeg Run/Stop [DPT\_1.010] - 0-Stop;1-Run
- |43: Control\_AntiLeg Setpoint [DPT\_9.001] - °C
- |93: Status\_AntiLeg Run/Stop [DPT\_1.010] - 0-Stop;1-Run
- |94: Status\_AntiLeg Setpoint [DPT\_9.001] - °C

**Figure 4.5** Anti-legionella sysmte communication objects

The Hitachi Yutaki S units include an Anti-legionella system. From the gateway, this function can be activated by sending a "1" value to the Control\_AntiLeg Run/Stop object and can be stopped by sending a "0" value to the same object.

It is also possible to send a value to set the temperature of the Anti-legionella system to this value. To do it so you have to use the Control\_AntiLeg Setpoint object.

**⚠️ IMPORTANT:** Anti-legionella will set the water temperature to the setting value during the specified time. This temperature will be dangerous to the user and could burn him or her. Installer is responsible for configuring it properly, advising the user, and enabling the function.

#### 4.1.5 KNX menu blocking

- |44: Control\_KNX Blocks/Enables Menu [DPT\_1.003] - 0-Block;1-Enable
- |95: Status\_KNX Blocks/Enables Menu [DPT\_1.003] - 0-Block;1-Enable

**Figure 4.6** KNX menu communication objects

This object allows blocking or enabling the KNX menu from Hitachi's LCD panel. Sending a "0" value will block the Menu, while sending a "1" value will enable the Menu.

#### 4.1.6 Errors and Alarms

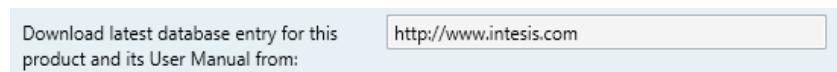

- 96: Status\_Error/Alarm [DPT\_1.005] - 0-No alarm;1-Alarm
- 97: Status\_Error Code [2byte] - 0-No error/Any other see man.

**Figure 4.7** Errors and alarms communication objects

These objects allow reading the system status indicating if any alarm or error is active (Status\_Error/Alarm) and, in case it exists, it indicates which error is (Status\_Error Code). See section 7 to get more information about the error codes.

#### 4.2 General dialog

In the General Dialog (settings) tab, it is possible to enable, disable or modify the parameters shown in Figure 4.1. For instance, the first field is showing where you can download the database and the user manual from.

**Figure 4.8** Database and User Manual location

##### 4.2.1 Model

This parameter enables or disables communication objects depending on the Yutaki model.

**Figure 4.9** System working mode parameter details

- When selecting "**Yutaki series 2015 or older**", objects available will be related to Yutaki S and Yutaki S80 models from 2015 or before (default objects).
- When selecting "**Yutaki series 2016 or newer**", objects available will be related to Yutaki S, Yutaki S Combi, Yutaki S80 and Yutaki M models from 2016 or later.

##### 4.2.2 System is Yutaki S80

This parameter enables specific objects for Yutaki S80 and filters objects that do not apply to the Yutaki S80.

**Figure 4.10** System working mode parameter details

##### 4.2.3 System working mode

This parameter enables or disables communication objects depending on the working mode selected: Water mode, Air, mode or Full (which includes both: Water and Air).

**Figure 4.11** System working mode parameter details

- When selecting “**Water**” the interface will work for a water climate environment only. Water climate control and status objects will be available. Air climate control and status objects will be disabled.

### OTC Mode

The OTC mode (*Output Temperature Compensation*) allows keeping the desired indoor temperature despite external temperature variations.

From the gateway, you can:

- Turn this function off by sending a “1” value to the Control\_C1 OTC Mode Heat/Cool Off communication object.

- ↳|7: Control\_C1 Heat OTC Mode Off [DPT\_1.002] - 1-Set OTC Mode OFF
- ↳|11: Control\_C1 Cool OTC Mode Off [DPT\_1.002] - 1-Set OTC Mode OFF
- ↳|52: Status\_C1 Heat OTC Mode Off [DPT\_1.002] - 1-OTC Mode OFF is set
- ↳|56: Status\_C1 Cool OTC Mode Off [DPT\_1.002] - 1-OTC Mode OFF is set

**Figure 4.12** OTC Mode Off communication objects

- Activate the different modes available for the calculus of the water temperature for the cooling or heating the facility where the unit is placed:
  - Points: User fixes 4 points that will create a line function that will depend on the current ambient temperature.
  - Gradients: In this case, the function used is not a line but a gradient. Only available for the Heat mode.
  - Fix: The temperature adjustment is only performed by a fixed value. This makes the unit to keep this fixed value all the time.

- ↳|8: Control\_C1 Heat OTC Mode Points [DPT\_1.002] - 1-Set OTC Mode POINTS
- ↳|9: Control\_C1 Heat OTC Mode Grad [DPT\_1.002] - 1-Set OTC Mode GRAD
- ↳|10: Control\_C1 Heat OTC Mode Fix [DPT\_1.002] - 1-Set OTC Mode FIX
- ↳|11: Control\_C1 Cool OTC Mode Off [DPT\_1.002] - 1-Set OTC Mode OFF
- ↳|12: Control\_C1 Cool OTC Mode Points [DPT\_1.002] - 1-Set OTC Mode POINTS
- ↳|13: Control\_C1 Cool OTC Mode Fix [DPT\_1.002] - 1-Set OTC Mode FIX
- ↳|53: Status\_C1 Heat OTC Mode Points [DPT\_1.002] - 1-OTC Mode POINTS is set
- ↳|54: Status\_C1 Heat OTC Mode Grad [DPT\_1.002] - 1-OTC Mode GRAD is set
- ↳|55: Status\_C1 Heat OTC Mode Fix [DPT\_1.002] - 1-OTC Mode FIX is set
- ↳|56: Status\_C1 Cool OTC Mode Off [DPT\_1.002] - 1-OTC Mode OFF is set
- ↳|57: Status\_C1 Cool OTC Mode Points [DPT\_1.002] - 1-OTC Mode POINTS is set
- ↳|58: Status\_C1 Cool OTC Mode Fix [DPT\_1.002] - 1-OTC Mode FIX is set

**Figure 4.13** OTC Mode type selection communication objects

### Water mode temperatures

Using the following communication objects it is possible to control/monitorize water setpoint temperatures for the Heat and Cool modes (C1 Water Heat Setpoint and C1 Water Cool Setpoint).

- ↗|14: Control\_C1 Water Heat Setpoint [DPT\_9.001] - °C
- ↗|15: Control\_C1 Water Cool Setpoint [DPT\_9.001] - °C
- ↗|59: Status\_C1 Water Heat Setpoint [DPT\_9.001] - °C
- ↗|60: Status\_C1 Water Cool Setpoint [DPT\_9.001] - °C

**Figure 4.14** Water Mode temperatures communication objects

- When selecting “**Air**”, the interface will work for an air climate environment only. Air climate control and status objects will be available. Water climate control and status objects will be disabled.

### Air mode temperatures

With the communication objects corresponding to this mode enabled, control/monitoring of the setpoint temperature of the thermo (C1 Thermo Setpoint) and the ambient temperature provided by a thermostat not included in the Hitachi system (C1 Ambient Temp).

- ↗|19: Control\_C1 Thermo Setpoint Temp [DPT\_9.001] - °C
- ↗|20: Control\_C1 Ambient Temp [DPT\_9.001] - °C
- ↗|64: Status\_C1 Thermo Setpoint Temp [DPT\_9.001] - °C
- ↗|65: Status\_C1 Ambient Temp [DPT\_9.001] - °C

**Figure 4.15** Air mode temperature communication objects

- When selecting “**Full**”, the interface will work for an air and water climate environment. Air and Water climate control and status objects will be available.

**NOTE:** If Yutaki S80 is selected, some of this communication objects may not be present.

#### 4.2.4 2nd circuit (C2) is available

This parameter enables or disables the Control\_ and Status\_ communication objects of a second circuit (or climate zone). In case the project is divided into 2 separated circuits this parameter needs to be selected to get control on each circuit independently.

**Figure 4.16** 2nd circuit parameter detail

- When selecting “**No**”, the gateway will hide the 2nd circuit (C2) communication objects.
- When selecting “**Yes**”, the gateway will show the the 2nd circuit (C2) communication objects. Depending on the other selected parameters, some objects will remain hidden and some others will be shown.

- Run and Stop status:

■ ↳|21: Control\_C2 Run/Stop [DPT\_1.010] - 0-Stop;1-Run  
 ■ ↳|68: Status\_C2 Run/Stop [DPT\_1.010] - 0-Stop;1-Run

**Figure 4.17** 2nd circuit Run/Stop communication objects

To activate or deactivate the 2nd circuit (C2) a “1” value or a “0” value needs to be sent respectively to the Run/stop communication object.

- If “**Water**” mode is selected:

■ ↳|21: Control\_C2 Run/Stop [DPT\_1.010] - 0-Stop;1-Run  
 ■ ↳|22: Control\_C2 Heat OTC Mode Off [DPT\_1.002] - 1-Set OTC Mode OFF  
 ■ ↳|23: Control\_C2 Heat OTC Mode Points [DPT\_1.002] - 1-Set OTC Mode POINTS  
 ■ ↳|24: Control\_C2 Heat OTC Mode Grad [DPT\_1.002] - 1-Set OTC Mode GRAD  
 ■ ↳|25: Control\_C2 Heat OTC Mode Fix [DPT\_1.002] - 1-Set OTC Mode FIX  
 ■ ↳|26: Control\_C2 Cool OTC Mode Off [DPT\_1.002] - 1-Set OTC Mode OFF  
 ■ ↳|27: Control\_C2 Cool OTC Mode Points [DPT\_1.002] - 1-Set OTC Mode POINTS  
 ■ ↳|28: Control\_C2 Cool OTC Mode Fix [DPT\_1.002] - 1-Set OTC Mode FIX  
 ■ ↳|29: Control\_C2 Water Heat Setpoint [DPT\_9.001] - °C  
 ■ ↳|30: Control\_C2 Water Cool Setpoint [DPT\_9.001] - °C  
 ■ ↳|34: Control\_C2 Thermo Setpoint [DPT\_9.001] - °C  
 ■ ↳|35: Control\_C2 Ambient Temp [DPT\_9.001] - °C  
 ■ ↳|68: Status\_C2 Run/Stop [DPT\_1.010] - 0-Stop;1-Run  
 ■ ↳|69: Status\_C2 Heat OTC Mode Off [DPT\_1.002] - 1-OTC Mode OFF is set  
 ■ ↳|70: Status\_C2 Heat OTC Mode Points [DPT\_1.002] - 1-OTC Mode POINTS is set  
 ■ ↳|71: Status\_C2 Heat OTC Mode Grad [DPT\_1.002] - 1-OTC Mode GRAD is set  
 ■ ↳|72: Status\_C2 Heat OTC Mode Fix [DPT\_1.002] - 1-OTC Mode FIX is set  
 ■ ↳|73: Status\_C2 Cool OTC Mode Off [DPT\_1.002] - 1-OTC Mode OFF is set  
 ■ ↳|74: Status\_C2 Cool OTC Mode Points [DPT\_1.002] - 1-OTC Mode POINTS is set  
 ■ ↳|75: Status\_C2 Cool OTC Mode Fix [DPT\_1.002] - 1-OTC Mode FIX is set  
 ■ ↳|76: Status\_C2 Water Heat Setpoint [DPT\_9.001] - °C  
 ■ ↳|77: Status\_C2 Water Cool Setpoint [DPT\_9.001] - °C  
 ■ ↳|81: Status\_C2 Thermo Setpoint [DPT\_9.001] - °C  
 ■ ↳|82: Status\_C2 Ambient Temp [DPT\_9.001] - °C

**Figure 4.18** 2nd circuit Water Mode communication objects

- If “**Air**” mode is selected:

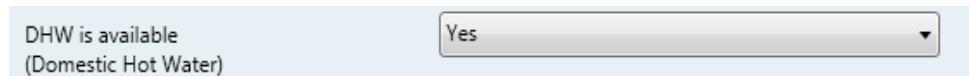

■ ↳|34: Control\_C2 Thermo Setpoint [DPT\_9.001] - °C  
 ■ ↳|35: Control\_C2 Ambient Temp [DPT\_9.001] - °C  
 ■ ↳|81: Status\_C2 Thermo Setpoint [DPT\_9.001] - °C  
 ■ ↳|82: Status\_C2 Ambient Temp [DPT\_9.001] - °C

**Figure 4.19** 2nd circuit Air Mode communication objects

- If “**Full**” mode is selected, all communication objects present when selecting “**Water**” or “**Air**” will be enabled for this mode too.

#### 4.2.5 DHW is available (Domestic Hot Water)

This parameter enables or disables the Control\_ and Status\_ objects corresponding to the control and monitoring of a water tank or DHW system.

**Figure 4.20** DHW Parameter detail

- When selecting “**No**”, the gateway will hide communication objects related with the water tank or the Domestic Hot Water system.
- When selecting “**Yes**”, the gateway will show the communication objects related with the water tank or the Domestic Hot Water system.

##### Domestic Hot Water

By means of Control\_ DHW Run/Stop and Control\_ DHW Setpoint, it is possible to turn on/off the DHW system and to control its setpoint temperature.

Through the Status\_ DHW Temperature communication object, it is possible to read the instantaneous temperature of the DHW system.

- ↳ 36: Control\_DHW Run/Stop [DPT\_1.010] - 0-Stop;1-Run
- ↳ 39: Control\_DHW Setpoint [DPT\_9.001] - °C
- ↳ 85: Status\_DHW Run/Stop [DPT\_1.010] - 0-Stop;1-Run
- ↳ 88: Status\_DHW Setpoint [DPT\_9.001] - °C
- ↳ 89: Status\_DHW Temperature [DPT\_9.001] - °C

**Figure 4.21** DHW mode communication objects

#### 4.2.6 Swimming pool is available

This parameter enables or disables the Control\_ and Status\_ objects corresponding to the control and monitoring of a swimming pool system present in the project

**Figure 4.22** Swimming pool parameter details

- When selecting “**No**”, the gateway will hide communication objects related with the swimming pool.
- When selecting “**Yes**”, the gateway will show communication objects related with the swimming pool.

### Swimming pool

By means of Control\_SwimPool Run/Stop and Control\_SwimPool Setpoint, it is possible to turn on/off the Swimming pool system and also to control its setpoint temperature.

Through the Status\_SwimPool Temperature communication object, it is possible to read the instantaneous temperature of the Swimming pool system.

- 40: Control\_SwimPool Run/Stop [DPT\_1.010] - 0-Stop;1-Run
- 41: Control\_SwimPool Setpoint [DPT\_9.001] - °C
- 90: Status\_SwimPool Run/Stop [DPT\_1.010] - 0-Stop;1-Run
- 91: Status\_SwimPool Setpoint [DPT\_9.001] - °C
- 92: Status\_SwimPool Temperature [DPT\_9.001] - °C

**Figure 4.23** Swimming pool mode communication objects

### 4.2.7 Show extra information objects (for Status)

These parameters enable or disable the Status\_ communication objects related to the monitoring of extra information depending on the installed Hitachi model (Yutaki S or Yutaki S80).

- When selecting “**No**”, the gateway will hide communication objects related with the extra information provided by the Hitachi units.
- When selecting “**Yes**”, the gateway will offer you to select extra information for a Yutaki S80 model or the rest of Yutaki S models.

**Figure 4.24** Extra Information parameters detail

### Yutaki S Extra Information

- 98: Status\_Operation State Unit On/Off [DPT\_1.001] - 0-Off;1-On
- 99: Status\_Operation State Cool Demand [DPT\_1.001] - 0-Off;1-On
- 100: Status\_Operation State Cool Thermo [DPT\_1.001] - 0-Off;1-On
- 101: Status\_Operation State Heat Demand [DPT\_1.001] - 0-Off;1-On
- 102: Status\_Operation State Heat Thermo [DPT\_1.001] - 0-Off;1-On
- 103: Status\_Operation State DHW [DPT\_1.001] - 0-Off;1-On
- 104: Status\_Operation State SwimPool [DPT\_1.001] - 0-Off;1-On
- 105: Status\_Operation State Alarm [DPT\_1.005] - 0-No alarm;1-Alarm
- 106: Status\_Outdoor Ambient Temp [DPT\_9.001] - °C
- 107: Status\_Second Ambient Temp [DPT\_9.001] - °C
- 108: Status\_Water Inlet Temp [DPT\_9.001] - °C
- 109: Status\_Water Outlet Temp [DPT\_9.001] - °C

- ↳ 110: Status\_Defrost Operation [DPT\_1.001] - 0-Off;1-On
- ↳ 111: Status\_Water Pump 1 Operation [DPT\_1.001] - 0-Off;1-On
- ↳ 112: Status\_Water Pump 2 Operation [DPT\_1.001] - 0-Off;1-On
- ↳ 113: Status\_Water Pump 3 Operation [DPT\_1.001] - 0-Off;1-On
- ↳ 114: Status\_Disch. Gas Temp [DPT\_9.001] - °C
- ↳ 115: Status\_Suct. Gas Temp [DPT\_9.001] - °C
- ↳ 116: Status\_Gas Temp THMg [DPT\_9.001] - °C
- ↳ 117: Status\_Liquid Temp THMI [DPT\_9.001] - °C
- ↳ 118: Status\_Water Outlet Temp 3 [DPT\_9.001] - °C
- ↳ 119: Status\_Outdoor AmbAvg Temp [DPT\_9.001] - °C
- ↳ 120: Status\_Inv Oper Freq [DPT\_14.033] - Hz
- ↳ 121: Status\_Indoor Exp. Valve Opening [DPT\_5.001] - %
- ↳ 122: Status\_Outdoor Exp. Valve Opening [DPT\_5.001] - %
- ↳ 123: Status\_Mixing Valve Position [DPT\_5.001] - %
- ↳ 124: Status\_Compressor Run Current [DPT\_9.021] - mA

**Figure 4.25** Extra Information for non Yutaki S80 status communication objects

### Yutaki S80 Extra Information

- ↳ 135: Status\_Disch. Gas Temp R134A [DPT\_9.001] - °C
- ↳ 136: Status\_Suct. Gas Temp R134A [DPT\_9.001] - °C
- ↳ 137: Status\_Liquid Gas Temp R134A [DPT\_9.001] - °C
- ↳ 138: Status\_Evap. Gas Temp R134A [DPT\_9.001] - °C
- ↳ 139: Status\_Disch. Pressure R134A [DPT\_14.058] - Pa
- ↳ 140: Status\_Suct. Pressure R134A [DPT\_14.058] - Pa
- ↳ 141: Status\_Inv Oper Freq R134A [DPT\_14.033] - Hz
- ↳ 142: Status\_Indoor Exp. Valve Open R134A [DPT\_5.001] - %
- ↳ 143: Status\_Compressor Run Current R134A [DPT\_9.021] - mA
- ↳ 144: Status\_Error Code R134A [1byte] - HI error code

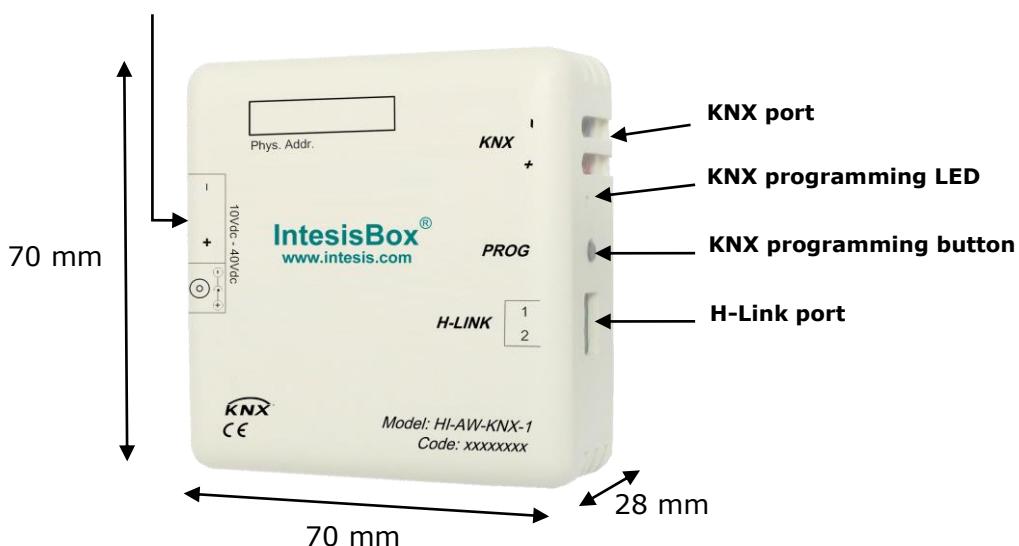

**Figure 4.26** Extra Information for Yutaki S80 status communication objects

For more details about the information provided by those communication objects, please check the Hitachi user manual.

## 5. Technical Specifications

<b>Enclosure</b>	ABS (UL 94 HB) de 2,5 mm thick
<b>Dimensions</b>	70 X 70 X 28 mm
<b>Weight</b>	70g
<b>Color</b>	Ivory White
<b>Power supply</b>	29V DC, 6mA (KNX bus)
<b>External Power Supply</b>	10-40V DC, 100mA <b>(Recommended:</b> 12V DC, 100 mA) Must use a NEC Class 2 or Limited Power Source (LPS) and SELV rated power supply. Plug-in terminal block for power connection (2 poles).
<b>Terminal wiring (for power supply and low-voltage signals)</b>	Per terminal: solid wires or stranded wires (twisted or with ferrule) 1 core: 0.5mm <sup>2</sup> ... 2.5mm <sup>2</sup> 2 cores: 0.5mm <sup>2</sup> ... 1.5mm <sup>2</sup> 3 cores: not permitted
<b>KNX port</b>	1 x KNX TP1 (EIB) port opto-isolated. Plug-in terminal block (2 poles). TNV-1
<b>H-Link port</b>	Plug-in terminal block for H-Link bus connection (2 poles) with no polarity
<b>LED indicators</b>	1 x KNX programming.
<b>Push buttons</b>	1 x KNX programming.
<b>Configuration</b>	Configuration with ETS.
<b>Operating Temperature</b>	From 0°C to 40°C
<b>Storage Temperature</b>	From 0°C to 40°C
<b>Operating Humidity</b>	25-90% at 50°C, non condensing
<b>Isolation voltage</b>	External Power Supply – KNX: 2500V External Power Supply – H-Link: 1500V
<b>RoHS conformity</b>	Compliant with RoHS directive (2002/95/CE).
<b>Certifications</b>	CE conformity to EMC directive (2004/108/EC) and Low-voltage directive (2006/95/EC) EN 61000-6-2; EN 61000-6-3; EN 60950-1; EN 50491-3; EN 50090-2-2; EN 50428; EN 60669-1; EN 60669-2-1

**External Power Supply connection**

## 6. Compatible Air-to-Water (A.W.) units

A list of Hitachi unit model references compatible with HI-AW-KNX-1 and their available features can be found in:

[https://www.intesisbox.com/intesis/support/compatibilities/IntesisBox\\_HI-AW-xxx-1\\_Compatibility.pdf](https://www.intesisbox.com/intesis/support/compatibilities/IntesisBox_HI-AW-xxx-1_Compatibility.pdf)

## 7. Error Codes

KNX Error Code	Remote Controller Error Code	Error Description
00	N/A	No errors
02	02	Activation of Outdoor Unit Protection Device (Except for Alarm Code 41, 42)
03	03	Transmission Error
04	04	Inverter Transmission Abnormality
05	05	Power Phase Detection Abnormality
06	06	Undervoltage, Overvoltage
07	07	Abnormal decrease of discharge gas superheat degree
08	08	Compressor-Top Temp Over-increase
11	11	Water inlet thermistor abnormally (THM <sub>WI</sub> )
12	12	Water outlet thermistor abnormally (THM <sub>WO</sub> )
13	13	Indoor Liquid Pipe Temp Thermistor Abnormality (THM <sub>L</sub> )
14	14	Indoor Gas Pipe Temp. Thermistor Abnormality (THM <sub>G</sub> )
15	15	Water outlet C2 thermistor abnormally (THM <sub>WO2</sub> )
16	16	Water DHWT thermistor abnormally (THM <sub>DHWT</sub> )
17	17	Swimming pool thermistor abnormally (THM <sub>SWP</sub> )
18	18	Water outlet boiler thermistor abnormally (THM <sub>WO3</sub> )
20	20	Compressor-Top Temp Thermistor Abnormality
21	21	2nd ambient thermistor abnormally (THM <sub>AMB2</sub> )
22	22	Outdoor Temp Thermistor Abnormality
24	24	Outdoor Heat Exchanger Liquid Pipe Thermistor Abnormality
31	31	Indoor/Outdoor Combination Setting Error
35	35	Indoor Unit Number Setting Error
38	38	Outdoor Protection Detection Circuit Abnormality
41	41	Cooling Overload
42	42	Heating Overload
47	47	Suction Pressure Decrease Prevention Activated
48	48	Inverter Current Sensor Abnormality
51	51	Overload Operation Protection Activation
53	53	Inverter Module Error
54	54	Inverter Fin Temp. Abnormality
55	55	Inverter Non-Operation
59	59	Inverter Fin Temp Thermistor Abnormality
b1	b1	Error in Address/Refrigerant System Setting
EE	EE	Compressor Factor Alarm
70	70	Hydraulic alarm
71	71	Water Pump Feedback
72	72	Thermostat Heater Alarm
73	73	Mixing over-temperature limit protection for Mixed circuit
74	74	Unit over-temperature limit protection
75	75	Freeze Protection by Cold water inlet, outlet temperature detection
76	76	Freeze Protection Stop by indoor liquid temperature thermistor
77	77	Opentherm Communication failure
78	78	RF Communication failure
79	79	Unit Capacity setting Error
80	80	LCD H-link transmission error
81	81	Incorrect PCB operation
65535	N/A	Communication error between HI-AW-KNX-1 interface and the Hitachi Unit

In case you detect an error code not listed, please contact your nearest Hitachi support center to get more information about the meaning of the error.

## Appendix A – Communication objects description table

### Control Objects

SECTION	OBJECT NUMBER	NAME	LONG.	DATAPPOINT TYPE		FLAGS				FUNCTION
				DPT_NAME	DPT_ID	R	W	T	U	
Run/Stop	<b>0</b>	Control_Unit Run/Stop	1 bit	DPT_Start	1.010		W	T		0 - Stop; 1 - Run
Mode	<b>1</b>	Control_Unit Mode	1 byte	DPT_HVACContr_Mode	20.105		W	T		0 - Auto; 1 - Heat; 3 - Cool
	<b>2</b>	Control_Unit Mode Cool/Heat	1 bit	DPT_Heat/Cool	1.100		W	T		0 - Cool; 1 - Heat
	<b>3</b>	Control_Unit Mode Auto	1 bit	DPT_Bool	1.002		W	T		1 - Set Auto Mode
	<b>4</b>	Control_Unit Mode Heat	1 bit	DPT_Bool	1.002		W	T		1 - Set Heat Mode
	<b>5</b>	Control_Unit Mode Cool	1 bit	DPT_Bool	1.002		W	T		1 - Set Cool Mode
	<b>6/21</b>	Control_Cx <sup>1</sup> Run/Stop	1 bit	DPT_Start	1.010		W	T		0 - Stop; 1 - Run
(C1 and C2)	<b>7/22</b>	Control_Cx <sup>1</sup> Heat OTC Mode Off	1 bit	DPT_Bool	1.002		W	T		1 - Set OTC Mode OFF
	<b>8/23</b>	Control_Cx <sup>1</sup> Heat OTC Mode Points	1 bit	DPT_Bool	1.002		W	T		1 - Set OTC Mode POINTS
	<b>9/24</b>	Control_Cx <sup>1</sup> Heat OTC Mode Grad	1 bit	DPT_Bool	1.002		W	T		1 - Set OTC Mode GRAD
	<b>10/25</b>	Control_Cx <sup>1</sup> Heat OTC Mode Fix	1 bit	DPT_Bool	1.002		W	T		1 - Set OTC Mode FIX
	<b>11/26</b>	Control_Cx <sup>1</sup> Cool OTC Mode Off	1 bit	DPT_Bool	1.002		W	T		1 - Set OTC Mode OFF

<sup>1</sup> X can be 1 or 2 depending on which circuit is being controlled.

	<b>12/27</b>	Control_Cx <sup>1</sup> Cool OTC Mode Points	1 bit	DPT_Bool	1.002		W	T	1 – Set OTC Mode POINTS
	<b>13/28</b>	Control_Cx <sup>1</sup> Cool OTC Mode Fix	1 bit	DPT_Bool	1.002		W	T	1 – Set OTC Mode FIX
	<b>14/29</b>	Control_Cx <sup>1</sup> Water Heat Setpoint	2 bytes	DPT_Value_Temp	9.001		W	T	°C (Between 20°C and 80°C)
	<b>15/30</b>	Control_Cx <sup>1</sup> Water Cool Setpoint	2 bytes	DPT_Value_Temp	9.001		W	T	°C (Between 5°C and 21°C)
	<b>16/31</b>	Control_Cx <sup>1</sup> ECO Mode	1 bit	DPT_Bool	1.002		W	T	0 – Comfort Mode; 1 – ECO Mode
	<b>17/32</b>	Control_Cx <sup>1</sup> ECO Heat Offset Temperature	2 bytes	DPT_Value_Temp	9.001		W	T	°C
