The rest of the Inet
system

The rest of the Inet
system
Reads and Wrrites to
the MR's
(virtual MR's)

The rest of the Inet
system

```
+-----------------------+
|         7793          |
+-----------------------+
```

```
+-----------------------+
|         7793          |
+-----------------------+
```

```
+---------+
|  MR #1  |
+---------+
```

```
+---------+
|  MR#2   |
+---------+
```

RS485

```
+---------+
| Gateway |
+---------+
```

gateway replaces the
trunk of MR's with a set
of virtual MR's inside
the gateway

You read and write to
them as you would to
any real MR's

```
+---------+
|  MR#3   |
+---------+
```

Gateway connects to a
7793 - Connectt he
gateway to the 7793\s
RS485 port where you
would notmally
connect a trunk of
MR's

```
+---------+
|  MR#?   |
+---------+
```
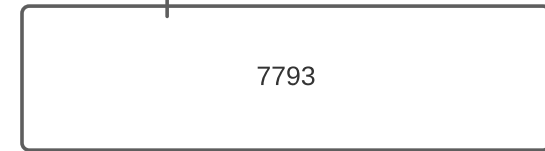

RS485

Typical 7793
arrangement

The rest of the Inet
system

7793

RS485

gateway replaces the
trunk of MR's with a set
of virtual MR's inside
the gateway

Gateway

RS485

Bancet
MSTP
system

Or any oher
serial or
Ethernet
protocol.
ModbusTCP,
BACnetIP etc
