

FS-8705-120 – Zonex

DATASHEET - Rev No. 1.0.1

DESCRIPTION

The Zonex Driver allows the FieldServer to poll and set data from Zonex devices over Ethernet using the HTTP protocol. The Zonex Driver uses HTTP request.

The driver was developed to communicate with Zonex web-server enabled devices, specifically GenX and RM devices.

The FieldServer acts as an HTTP Client. When configured the FieldServer polls for data from Zonex GenX and RM devices. This data is stored on the

FieldServer to be mapped to BACnet IP or simply to be viewed. The Zonex driver will also periodically attempt to write any changes that were made to writable BACnet IP objects.

CONNECTION FACTS

FIELDSEVER MODE	NODES	COMMENTS
Client	1	The FieldServer can be configured to communicate with one Zonex web server
Server	N/A	

FORMAL DRIVER TYPE

Ethernet

HTTP Client

COMPATIBILITY

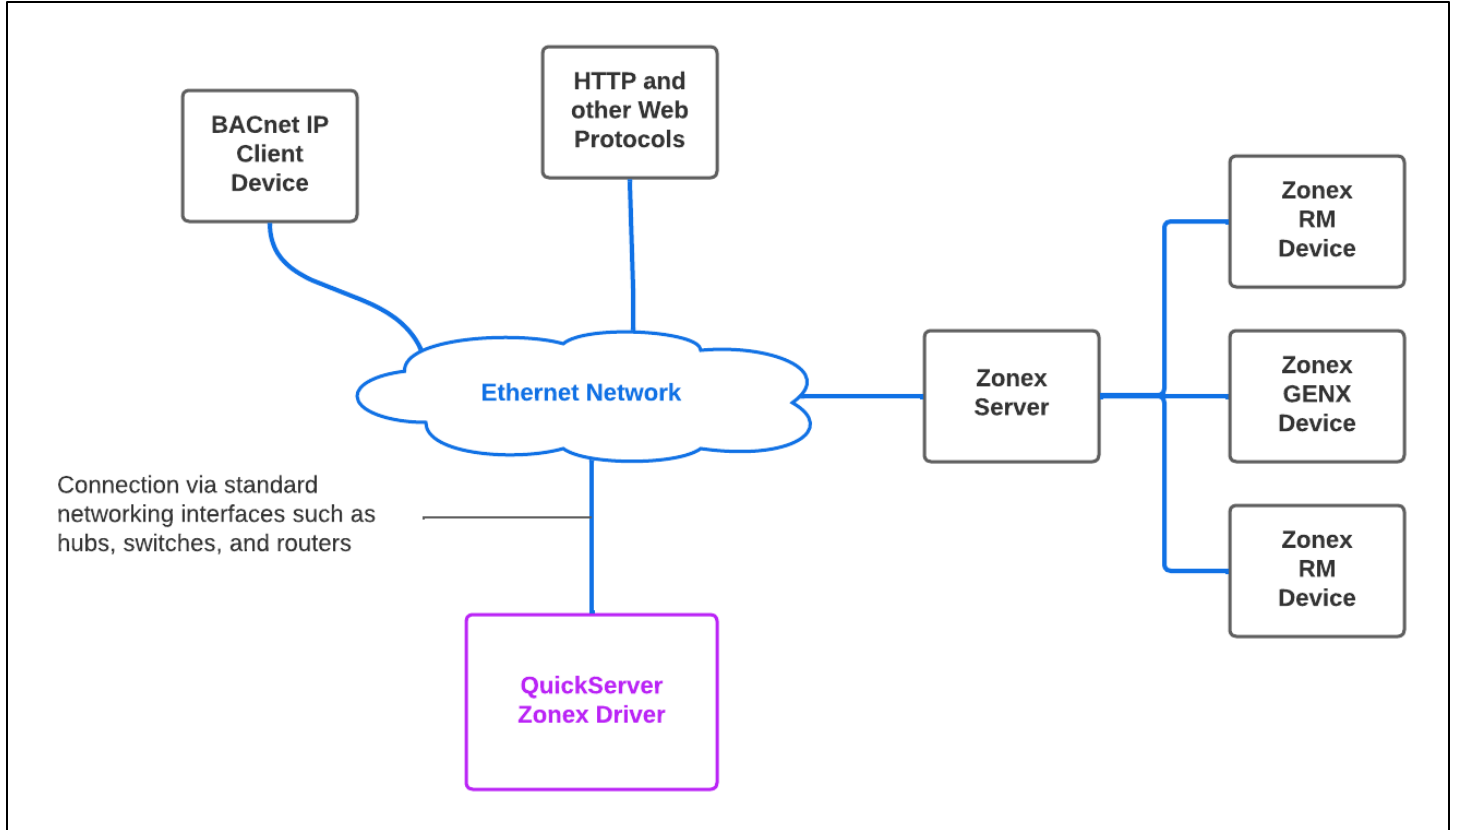

FIELDSEVER MODEL	COMPATIBLE
QuickServer FS-QS-1x11	Yes
QuickServer FS-QS-2x10	Yes
QuickServer FS-QS-3x10	Yes

CONNECTION INFORMATION

Connection Type: Ethernet
 Ethernet Speeds Supported: 10Base-T, 100Base-T

CONNECTION CONFIGURATIONS

This block diagram lists describes how the FieldServer connects to Zonex devices and makes the data available over BACnet IP.

Model Number – Driver Name

COMMUNICATION FUNCTIONS

When configured, the FieldServer sends HTTP GET and POST requests to the specified Zonex web server.

The driver supports extracting data the following fields:

- Status – SysDiagnosticID
- Status – SysConfig (Fan Mode only)
- Status – StatDataID
- RM – RMD
- RM – RMC (Fan Mode only)
- RM – RMS

CUSTOMER SUPPORT

Zonex Driver for FieldServer was developed by Chipkin, and we are proud to provide support for our products. For technical support, sales and customer service, please call us at 1 (866) 383-1657.

Thanks for choosing Chipkin's products and integration services to meet your building and industrial automation requirements!

Chipkin™ is a building and industrial automation protocol expert. We develop, configure, install and support gateways (protocol converters), data loggers and remote monitor and controlling applications. Founded in October 2000, Chipkin provides expert solutions for converting BACnet®, Modbus®, and LonWorks®—to name just a few—and enabling interfaces for HVAC, fire, siren, intercom, lighting, transportation and fuel systems. The high-quality products we offer (including those from other vendors) interface with Simplex™, Notifier™, McQuay™, GE™ and many others—so you can rest assured that we will select the most appropriate solution for your application.

With Chipkin you are buying a solution. Our configuration expertise in this field combined with free BACnet and other tools ensure your success; and our customer support via phone, email and remote desktop tools means that we are there when you need us. Chipkin is a small responsive company, and we live or die by the quality of our service—and with offices in two time zones—we can provide support when you need it. Give us a call now!
