

INT24-RET24 & INT48-RET48

DESCRIPTION

The INTxx-RETxx retrofit kit is designed to mount into an existing TLC panel interior - INTRxxxx. It provides mounting wings to install the new LightSweep control modules.

The INT24-RET24 kit for upgrading the RTUB24 with the INTR24 relay frame allows to install up to 6 LightSweep control modules.

The INT48-RET48 kit for upgrading the RTUB48 with the INTR48 relay frame allows to install up to 10 LightSweep control modules.

The retrofit kit includes the metallic mounting brackets and the long module connector cables.
