TABLE OF CONTENTS

1   Installed Files

For most customers the gateway is shipped with the appropriate files installed.

On occasions we ship devices to customers before they have made a decision on how it is to be applied. In such cases or in cases where you are re-purposing a gateway then firmware and configuration will need to be installed

Google 'Chipkin.com simplified support FAQ'

2   Startup

1. Turn on all the panels after connecting them to a RS485 trunk that terminates on port R1 on the gateway.
2. Restart the gateway.
3. Navigate to 192.168.2.101/htm/fsgui.htm#34_OID
4. Observe the Combined Msg Log – look for anything unexpected.
5. After you see a message that discovery is complete
6. Navigate to 192.168;2.101/CustomUI/protec.html
7. Trigger discovery with a restart. This step is essential to make the BACnet objects visible.

Trigger Discovery
Trigger Discovery, new config, restart
Trigger Remapping
Trigger Token

8. When you add or remove panels repeat this action.

3   Testing

You can use the Chipkin BACnet Explorer for testing.
