

## FieldServer Driver - Serial FS-8710-01 SMC2450

**Driver Code:** SMC2450  
**Version:** 1.00

**Devices Supported:** SMC2450 devices

Device	Tested
Model 2450	Factory

**Interface:** RS-232 or RS-485  
**Date Rate:** 2400 Baud

**Modbus Type Function Codes Supported:**

Function Codes	<i>Description</i>
03	Read Output Registers (4xxxx)
06	Preset Single Register (4xxxx)

**Driver Notes:**

1. The FieldServer is capable of supporting devices that use two Modbus Registers to transfer IEEE floating point format.
2. The FieldServer is capable of being used as a port expander. Eight RS232 and two RS485 serial ports are available for this purpose.
