2.1	Instructions .....	2

## 1 INTRODUCTION

This is an Enote describing how to delete the LonWorks Bindings and external interface files, in order to regenerate these files.

## 2 DELETING LONVARS.CFG AND FSERVER.XIF

### 2.1 Instructions

- Open a command prompt to the following folder: C:\FieldServer Technologies\FieldServer Utilities\Bin
- Type the following: `ruinet -i<ip_address> -zlonvars.cfg`
  1. replace <ip\_address> with the IP address of the FieldServer
  2. For example: `ruinet -i192.168.2.100 -zlonvars.cfg`
- Type the following: `ruinet -i<ip_address> -zfserver.xif`
- Then restart the FieldServer with the command: `ruinet -i<ip_address> -b`

```
